## Surface to Two Diver Hardwire Intercom

The COM-S-HW2 Intercom unit provides the following features for the Commercial Diver:

- Electrically Isolated Connection to divers (cannot be shocked like other systems)
- Diver disconnected alarm (activates if com line is disconnected)
- Diver not breathing alarm (activates if diver stops breathing)
- Noise Suppression (reduces breathing noises, voice still loud and clear)
- Robust waterproof self closing panel connectors
- Audio In - to pipe down music to diver from portable music player
- Record Out - to record surface to diver communications
- External Speaker built in as well as Speaker Out for deck speaker
- May be powered by any source: boat or rechargeable battery or both
- Adapters to retrofit to other communication systems
